

Pest Free Howick Ward

A Howick Local Board funded project

PEST
FREE
AUCKLAND

Get involved!

Our urban environment is an important habitat for birds, insects and reptiles – they can only thrive if pest animal numbers are low.

Help bring back biodiversity to your gardens and see the native bird population increase – all from your own backyard! A number of locals are already actively involved in trapping – however to be even more effective we need approximately every fifth household involved.

If this sounds like you – please contact us:
