

Dear Neighbour,

I'm a student at _____ School and we're learning about how to care for our environment.

I noticed that you have Moth plant growing in your garden. Its white flowers may look pretty, but did you know its a horrible weed that kills our plants and trees?

You can recognise the moth plant by its long dark green vines, arrow shaped leaves, white flowers and large seed pods. Watch out the white sticky sap is poisonous!

Please think about removing moth plant from your garden. I'd be happy to come and remove it for you - I'm part of a competition to see who can remove the most. Just contact me =

Thanks for helping our environment.

Kind regards,
